THE TECH

VOL. XXVI. No. 56 BOSTON, MASS., WEDNESDAY, MARCH 6, 1907 PRICE THREE CENTS

MAKING SUCCESS OF WORK.

Mr. Francis, Tech Show Coach, Has Been Successful in Staging Amateur Shows.

Tech Show's success in the past two years has been due as much to the coaching which it received at the hands of Mr. James Francis as to any other thing. This year's production is rapidly rounding into shape under Mr. Francis' direction and the coach is working along the right lines to make "William, Willie, and Bill" the best show ever given by Tech men. His experience in the past two years has enabled Mr. Francis to understand what kind of a play Tech Show is supposed to be and his efforts are all directed towards making this year's production the right thing.

Mr. Francis is an Englishman, having come to this country only a few years ago and entering upon theatrical work in some of Henderson's productions. Later he re-

MR. JAMES FRANCIS.

turned to England and after staging some Christmas pantomines became the stage manager for Leslie Stuart, the author of "Florodora," "The Silver Slipper," and "The School Girl." Mr. Francis then brought "The Silver Slipper" to America, where he made a hit and became in demand as a stage manager.

After he had staged several musical comedies he was engaged by the Bank Officers of Boston to run "The Filibuster," and was secured by the Tech Show management to stage "The Chemical Maid." Mr. Francis then returned to New York, deciding never to return to amateur work, and became stage manager and comedian in "When Johnnie Comes Marching Home," going West with that production.

Tech Show followed him up, however, and Mr. Francis immediately left his company to come back to Tech. He was secured exclusively by Tech Show, but was allowed to run a small opera in Medford. Each year Mr. Francis also goes to Wesleyan to run a small opera there.

In private life Mr. Francis is a farmer and owns a large farm in New Jersey, where Mrs. Francis lives the year round. He has been so successful with amateurs that it is his intention to continue his work here.

JANUARY ISSUE OUT.

Technology Review Contains Many Articles of Interest to Tech Men.

The January number of the *Technology Review* has just appeared. The lateness of the issue is due to the late date of the annual alumni dinner, this number being held back in order to give a full account of this gathering.

In President Pritchett's article on "Samuel Cabot and His Relations to the Institute," the writer speaks from his personal acquaintance of six years with the man who has done so much toward the betterment of student life at the Institute. President Pritchett says: "My intimacy with him came about because, as a student of the Institute and as a member of the corporation, he had a hearty interest in all for which it stood and in all which it undertook to do. Any man who came as the president of the Institute was sure to come very quickly in contact with a man whose interest was so direct and constant."

The writer then reviews shortly Mr. Cabot's gifts to the Institute, his zeal for his chosen branch of engineering, chemistry, and his deep interest in the students.

Professor Noyes in his article, "Talk to First Year Students," points out the importance of the general studies, warns the young engineer to secure a good grounding in the fundamental subjects given in the first two years, and then gives some good advice in regard to the social side of the student's life. Professor Swain's article is a reprint of a paper presented by him before the annual convention of the American Society of Civil Engineers.

Dean Burton in his notes on study in Paris gave a short summary of the work done by him while studying last winter at the Sorbonne. He makes a comparison of the methods of teaching descriptive geometry in the French schools and those used at the Institute, Technology apparently having the advantage.

In the report of the income fund, it is shown that the committee has collected $67,052.31, and of the total number of subscriptions there is now $9116.50 yet to be paid in. The Institute has received without any restriction nearly $60,000.

TO MEET PRINCETON FRIDAY.

Manager Place of the Fencing Team announced Monday that Tech would meet Princeton Friday evening at the Gym. Although Princeton will be much stronger than either of the two teams which Tech has defeated this season, the fencers are confident of victory. This is the first time that Tech ever met Princeton in a dual fencing meet.

TECH MEN ON JURY.

In the annual jury list which has been posted in the City Hall, Technology is represented by Charles J. Paine, member of the Corporation, C. H. Walker of the Architectural Department, and Prof. Arlo Bates.

WON BY SMALL MARGIN.

Tech Leads in First Half but Dartmouth Wins Out, 22 to 16.

Dartmouth's championship basketball team barely won out from Tech last evening at the Gym, in the greatest game of basketball ever seen at the Gym. The final score was 22 to 16. The Sophomores won from the Freshmen, 21 to 20.

Tech ran up ten points in the first half before Dartmouth scored a point. The Dratmouth men were played off their feet for the first two-thirds of the half, but the pace began to tell on the Tech men and the half ended, Tech 13, Dartmouth 8.

In the second half, Grebenstein, Dartmouth's star player, went into the game and Dartmouth played a stronger game. Tech played hard and fierce throughout the half but couldn't keep up the pace.

The interclass game was a long rough-house with the score a tie most of the time. In the second half Wentworth and Nichols of the 'varsity went in for 1909, and the Sophomores pulled out a winner by one point. Last evening's game was the last of the season for the Institute and was by far the best game that the 'varsity has played. All of the men played star games last evening, and the team work showed great improvement over that in recent games.

DARTMOUTH.	M. I. T.
Brady, l.f.	Campbell, r.g
Morrisey, Grebenstien, r.f	Wentworth, l.g
Thompson, Dingle, c.	Pierce, Gregory, c.
Schildmiller, l.g.	Cahill, r.f.
Lane, r.g.	Kinnear, l.f

Score: Dartmouth 22; M.I.T. 16. Goals from floor: Cahill 2, Campbell, Kinnear, Pierce 2, Schildmiller 2, Dingle 2, Lane, Morrisey, Grebenstein 4. Goals from fouls: Cahill 4, Grebenstien 2, Referee: McGrail, Dartmouth. Timer John Mahan. Time: 20-min. halves. Attendance 600.

SOPHOMORE KOMMERS.

The Kommers will be in charge of the Sophomores next Saturday evening. The program as arranged has a wide variety of class talent on it and promises well. R. H. Allen will make his debut as a songster, and the Union will ring with his loud wails as he gives and imitation of singing which is intended to be comical. Bill Kelly will beat the box and his talent in that direction is well known. What is expected to be one of the most popular numbers on the program is Jenkins' famous "Not Wisely but to Wellesly." That song is so well illustrated by numerous "flunkers" around school that it never fails to find a sympathetic audience. Maurice Scharff, who will preside that evening, has arranged to give a few selections by four members of the Mandolin Club.

The guests of the evening will include Dean Burton and Prof. Wendell.

W. F. Knox, '07, right half back on the Yale University eleven for the past two seasons, has been appointed head field coach for the Yale football team next season.

CALENDAR.

WEDNESDAY, MARCH 6.

4.15 P.M. Tech Show Chorus Rehearsal at the Union.

THURSDAY, MARCH 7.

1.00 P.M. Institute Committee Meets at Notman's Studio.
4.00 P.M. Banjo Club Rehearsal in 33 Rogers.
4.00 P.M. Prize Drill Committee Meeting in 31 Rogers.
4.15 P.M. Tech Show Principals Rehearsal at the Union.
6.00 P. M. New York State Club Dinner at the Union.

FRIDAY MARCH 8.

4.00 P.M. Mandolin Club Rehearsal in 31 Rogers.
4.15 P.M. Tech Show Chorus Rehearsal at the Union.
6.30 P.M. Missouri Club Dinner at the Union.
7 00 P.M. Civic Club Meeting in 16 Rogers.
8.00 P.M. Fencing, Tech vs. Princeton at the Gym.

FACULTY NOTICE.

Second Year English.— Hour examination Friday, March 8. Bring *Chaucer to Arnold.*

NOTICES.

Lost.—An umbrella at the Kommers Saturday night. Please return to Cage.

Found.—A watch and fob. Owner may obtain same by applying to Bursar Rand.

Y. M. C. A. — Dr. E. A. Dodd of Emmanuel Church will address the Y. M. C. A. tomorrow at 1.30 P.M.

Ohio Club.—The second dinner of the Ohio Club will be held at the Union at 6 o'clock, March 14. Tickets seventy-five cents.

'95 Panels.—It is expected that the '95 panels for the Huntinton Hall frieze, which the class authorized at the annual meeting, will be commenced shortly.

Institute Committe.— The Institute Committee will have their pictures taken for *Technique '08*, on Thursday at 1 P.M. at Notman's It is exceedingly important that every one be there.

New York State Club.—The New York State Club will hold a dinner at the Union Thursday at 6 P.M. All men from the Empire State are invited to attend and are requested to send their names to Louis A. Freedman, '07.

Missouri Club.—The Missouri Club will hold a dinner at the Union Friday, March 8, at 6.30 P.M. All men who have at any time been in Missouri are eligible to membership and are requested to inform the secretary, A. F. Herold, '09, at once.

Civic Club.—The Civic Club will hold its regular meeting this week in 16 Rogers, Friday at 7 P.M. The question for discussion will be: "Resolved that suffrage should be restricted by an educational qualification." As some business is also to be transacted all members are urged to attend.

THE TECH

Published every Monday, Wednesday, and Friday during the college year (from September to June), by students of the Massachusetts Institute of Technology.

Entered as second-class matter October 6, 1904, at the post office at Boston, Mass., under the Act. of Congress of March 3, 1879.

In charge of this issue: W. F. DOLKE, 1908

Wednesday, March 6, 1907.

THE TECH takes pleasure in announcing the election of Mr. H. W. Hoole, 1908, to the Board of Editors.

THE TECH has received an excellent communication from the pen of "A Prominent Student" and requests that "A Prominent Student" give his name to the Editor-in-Chief so that it can be printed at the end of his article.

The frequenter of the General Library in Rogers in the future will have an opportunity to keep in touch with the news of all the principal colleges of the country. All of the prominent exchanges which THE TECH receives are to be placed on file in the library for the use of the student body. The list will include the following: *The Daily Princetonian*, *The Minnesota Daily*, *The Daily Maroon*, *The Purdee Exponent*, *The Harvard Crimson*, *The Yale News*, *The Columbia Spectator*, *The Pennsylvanian*, *The Illini*, *The Phillipian*, *The Tufts Weekly*, *The Brown Herald*, *Wellesley College News*, *Old Penn Weekly*, and *The Daily Nebraskan*.

COMMUNICATIONS.

The Editors do not hold themselves responsible for opinions expressed by correspondents.

TO THE EDITOR OF THE TECH:

A correspondent in the Monday TECH writes that "the Civic Club, although still existing nominally, had not shown any signs of activity to the student body at large during this year at least. If the club held any meetings or debates they were not made generally known." At least two debates actually occured, announced and reported in THE TECH. The club had charge of the Saturday dinner on February 16, at which Mr. Louis Frothingham spoke. The club held a meeting on November 23 with refreshments, to which all students were invited and at which Mr. Balch talked of the work of the G. G. A. in Boston; even the refreshments were announced on the bulletins.

The Civic Club would, I know, gladly entertain as candidates for membership all fellows who are interested in debating and would discuss with interest any suggestions for inclusion in its programme of talks on Current Events. The next meeting of the Club will be announced, as usual, in THE TECH.

H. L. SEAVER.

TO THE EDITOR OF THE TECH:

I should like to announce that the men who had in view the formation of a new debating club have decided to join the Civic Club.

In view of this, it would not seem necessary to reply to the statement made in a communication in Monday's issue of THE TECH that the Civic Club had not shown any signs of activity to the student body at large during this year. As, however, such statements, even if untrue, sometimes receive credence, I should like to state that if the men will refer to past issues of THE TECH they will find reports of meetings too numerous to mention here. They may also run across some of the articles which are written by prominent public men and published through the Civic Club.

There seems to be an impression abroad that Freshmen and Sophomores are not admitted to membership in the Civic Club. This idea is entirely wrong. Not only do we admit underclass men to the club, but we should also like to impress upon them the advisability of joining it in these lower years.

FRED'K BACHMANN.

TO THE EDITOR OF THE TECH:

At a meeting held Monday for the organization of a Debating and Current Events Club, the project of forming a new club was dropped, since the Civic Club most courteously invited all those interested in the new club to join their organization. Feeling that they would derive greater benefit from the prestige and organization of the older club, the organizers of the new society decided to accept this kind invitation and join their interests and energies with those of the Civic Club.

TECH MAN SELECTED.

One of the trio of expert engineers that have been selected to advise William H. Taft, secretary of war, when he goes to Panama the latter part of March, is a Tech man, John R. Freeman, '1876. One of the other men Frederic P. Stearns, is from Boston, while the other, Alfred Noble, is a western engineer.

Mr. Freeman has just returned from California, where he has been laying ont the plan for the Los Angeles water supply scheme. In this project a whole river will be carried for a long distance through the mountains and from the height of 3,820 feet to the level of the plain upon which the city stands. There will be enough water supplied to irrigate one hundred thousand acres of land, and the water power produced will be more than all that developed at Lawrence, Lowell, Manchester, and Holyoke combined.

NEW APPARATUUS RECEIVED.

The Department of Physics has received considerable accessions of apparatus this year, the most important consisting of high vacuum tubes for illustrating the recent researches of Wehnelt on the radiations from glowing metallic oxides. There are also several additions to the collection of gyroscopes, now a very complete one, a new Bose's apparatus for the study of short Hertz waves, and a new Geryk Air Pump. This last will prove useful for the ready production of high vacua without resource to a mercury pump.

The recently perfected apparatus for the study of microscopic objects by ultra-violet light, which was received some time ago from the Zeiss Optical Works, has been set up, but no work has as yet been done with it. The principle that the resolving power of a microscopic increases in direct proportion to the diminution of the wave length of the light employed is in this apparatus carried practically to the limit by using the ultra-violet radiation from the electric spark between cadmium or aluminium electrodes.

PROF. SWAIN'S READING POSTPONED.

Professor Swain's readings, which was to take place last Monday, has been postponed until next Monday, March 11, at 4 P.M.

"It pays to advertise," said Mark Twain. "When I was editing the Virginia City *Enterprise*, I tried to force this truth home in many ways.

"A superstitious subscriber once wrote and said he had found a spider in his paper. Was this good or bad luck? I replied to him.

"'Old Subscriber — The finding of a spider in your copy of the *Enterprise* was neither good luck nor bad. The spider was merely looking over our pages to find out what merchant was not advertising so that it could spin its web across his door, and lead a free and undisturbed existence forever after."

TO HOLD "HOOK NIGHT."

At the Freshman Kommers, which will be held on the 23d or 30th of this month, entertainment is to be furnished by members of the class in a reproduction of the popular Columbia "hook night." The "hook," wheelbarrow, and all other necessary accessories will be employed, and prizes will be awarded the most successful contestants, as evidenced by popular vote. An effort is also being made to form a quartet and small musical club to furnish further gaiety.

All '10 men should interest themselves in their Kommers and assist in whatever way they are able. Amateurs wishing to compete may address their applications to T. W. Saul at the Cage. The exact date of the Kommers is to be decided upon this week and it will be announced as soon as possible in THE TECH. The price of tickets will be the regular Kommers price, twenty five cents.

The Princeton Triangle Club will present "The Mummy Monarch" as its play this year. Its schedule provides for twelve performances, some as far west as Indianapolis.

The Pittsburg National league club has secured some pretty good material from the Princeton baseball camp, and is this year to take a turn in helping the Tigers along. The Pittsburg management announces that the team will play Princeton some time in May and that all the gate receipts will go to the benefit of the Princeton athletic fund.

Stanford University and the University of California are still in a deadlock over the matter of a date for their track meet. Faculty interference is promised if some agreement is not soon reached, although it is not known just what form this interference is to take. At the best, however, the result will not only put the track meet out of commission, but is likely to stop other contests for a time. The deadlock would probably do the same thing without the faculty.
